To whom it may concern,

The program "Living Vision", developed by Mr. MD Oleg Kovriguine specifically for Republic of Belarus is supported by our company. This program provides accessibility of "Living Vision", vision without glasses or contact lenses for visual perception at near and far after surgery of cataract, or getting surgery because of presbyopia effect or vision correction with IOL. Accessibility primarily in financial terms. We reduce the price for Rayner products for the period of 2016-2017 specifically for citizens of Republic of Belarus. Please note, that the only official recipient of our products (Rayner, United Kingdom) is medical center "New Vision", in Republic of Belarus. I wish you all a great vision and a good mood.

Yours faithfully

Alastair Ling

International Business Manager
